

Complete Systems

Complete Systems

DIBIR Group, in addition to manufacturing the single machine, is specialized in design and integration of complete automatic and semi-automatic systems. An offer that extends from the processing of raw materials to transformation in the finished product with filling and capping systems, in various packaging formats.

Applications

COSMETICS

PHARMACEUTICAL

FOOD &
NUTRACEUTICAL

CHEMICAL

HOME CARE

Models

Innovation, versatility and customization are the characteristics that distinguish the DIBIR Group systems, **ideal for both laboratories and for medium and large productions.**

Features

- [Calculations of flow rates, pressures, temperatures and experimental tests on new products
- [Dimensional study on the lay-out of the buildings
- [Machines suitable for filling liquid, dense and semi-dense in bottles and jars
- [Heated and thermostated dispensers for product dosage hot
- [Automatic lines made in rotary monoblocks o linear system, both with alternating step and movement continuous
- [Depending on the requests, it is possible to equip the system with manual loaders up to maximum automation, thanks to the use of robotic systems
- [Possibility of completing the systems with charging floor, scaffolding and service stairs

Advantages

SAFETY AND EASE OF USE

PLC and Color Touch Screen Panel supplied as standard on all models allow you to control the system with great simplicity and in total safety.

CONSULTANCY SERVICES

Technical consultancy and revamping on existing machinery.

CUSTOMIZATION

DIBIR Group systems can be designed, built and customized according to specifications Customer needs. The design and choice of the right machinery allow a considerable optimization of processes and production times.

Turnkey solutions

DIBIR Group is able to follow the customer throughout the process of building the plant, starting from the analysis of needs, to design, up to the installation of the machine, offering turnkey solutions that perfectly meet the needs of your company.

- [Construction of complete production lines, from the installation of raw material storage tanks to the finished product storage tanks - as well as the connection to the "primary packaging" machines /lines
- [Design and construction of piping for the transport of process of raw materials
- [Construction of stations and water pretreatment groups with filtration
- [Design and construction of industrial thermotechnical plants for serving mixers
- [IQ and OQ protocol management and registration, and plant validation process

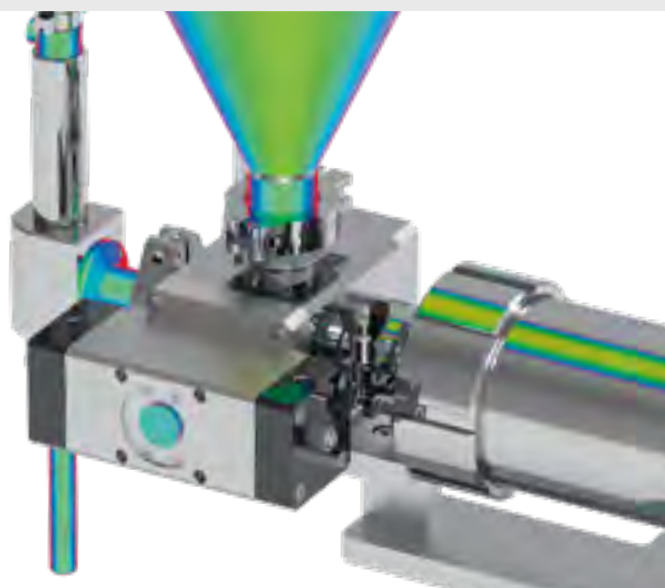

After sales service

Attention to the customer never stops:

DIBIR Group guarantees a technical high-level service and after-sales service ad hoc for each Customer.

Testing and installations are certified by a highly specialized technical staff, in able to guarantee assistance in every area.
